

Tushar Sharma

QA / SDET Engineer | Manual Testing | Automation Testing | AI/LLM Testing • Immediate Joiner
tushar07988@gmail.com | +91 8219463907 | Bengaluru, India | linkedin.com/in/tushar-sharma-b31959225 | github.com/TUSHAR7988

PROFESSIONAL SUMMARY

QA/SDET Engineer with 2+ years of experience in Manual and Automation testing across Android, Web, API, CRM, and AI/LLM-powered applications. Immediately available to join. Hands-on experience with Appium, Selenium WebDriver, TestNG, and Playwright (TypeScript) for Android and web automation, strong API validation skills, and hands-on QA test strategy and process design, including testing approaches for non-deterministic AI/LLM outputs (schema testing, RAG validation). Experienced in functional, regression, smoke, integration, and end-to-end testing, with CI/CD pipelines (Jenkins, Git-based workflows) and Agile development. Passionate about delivering high-quality, reliable products.

PROFESSIONAL EXPERIENCE

QA / SDET Engineer | Lazulite Technology Services LLC

05/2026 – 08/2026

Dubai, United Arab Emirates • Remote

- Implemented a QA process from scratch for a multi-tenant SaaS CRM — requirement reviews, test planning, functional/regression testing, defect triage, Jira reporting, and release sign-offs.
- Authored the QA Test Plan defining test strategy, scope, environments, severity, defect lifecycle, quality gates, and automation approach.
- Built a Playwright + TypeScript E2E automation framework using Page Object Model (POM), reusable fixtures, dotenv-based configuration, and authenticated session persistence (storageState) for the Next.js CRM.
- Designed a testing approach for the platform's AI agent (Lumen) to handle non-deterministic LLM output through contract/schema and guardrail testing.

Quality Assurance Engineer | Superfone

08/2024 – 05/2026

Bengaluru, India

- Owned end-to-end quality engineering for the Superfone AI Business Phone Dialer and CRM, covering telephony, CRM, AI call automation, and Android platforms.
- Developed and maintained Android automation frameworks using Appium, Java, Selenium WebDriver, TestNG, Maven, and Page Object Model architecture; automated regression suites covering Login, Dialer, Contacts, AI Receptionist, Google Business Profile, Review Campaigns, CRM workflows, and Call Management, achieving 60% regression coverage.
- Performed Android debugging using Android Studio, ADB, Logcat, and Firebase Console; validated app behavior across Android versions, physical devices, and emulators.
- Led functional and edge-case testing of the AI Receptionist and AI Outgoing Sales Call Agent, covering intent recognition, LLM behavior, transfer/fallback logic, and call status transitions.
- Performed REST API validation using Postman and backend response verification via JSON payload validation; collaborated closely with product, backend, and AI teams during sprint planning and defect triage.
- Collaborated closely with product, backend, and AI teams during sprint planning, story grooming, and defect triage to ensure quality early in the SDLC.

KEY PROJECTS

CRM Test Automation Framework — Playwright (TypeScript), pytest, PostgreSQL: hands-on automation practice against CRM-style REST/UI modules, in parallel with defining the Lazulite automation roadmap professionally.

Hybrid RAG PDF Chatbot — Python, Streamlit, LangChain, FAISS, BM25, Hugging Face, Sentence Transformers, Ollama: Streamlit-based Q&A app letting users upload PDFs and query contents via a hybrid retrieval pipeline combining FAISS semantic search and BM25 keyword search.

SofaScore Finished Match Monitoring System — Playwright, Python, Async: asynchronous monitoring system detecting football match completion within seconds, using a semaphore-controlled concurrency model for 24/7 fault-tolerant execution.

EDUCATION

B.E. in Computer Science Engineering, Chitkara University, Punjab • CGPA: 9.39

2020 – 2024

High School, Him Academy Public School, HP • 74%

2019 – 2020

TECHNICAL SKILLS

- Languages & API: Java, SQL, Python, JavaScript/TypeScript (basic), Shell scripting • Postman, REST Assured
- Automation Frameworks: Selenium WebDriver, Appium, Playwright, TestNG, JUnit, pytest, Maven, Page Object Model
- AI/LLM Testing: Conversational AI agent validation, (intent recognition, fallback/transfer logic), contract & schema testing for non-deterministic LLM output, RAG validation using deep-eval.
- Testing Types: Smoke, load testing, Functional, Cross-browser, sanity, Manual, Automation, Regression
- QA Process & DevOps: Test plan/strategy authorship, defect lifecycle design, severity/SLA frameworks, Jenkins, Git, GitHub
- Mobile & Debugging: Android Studio, Appium Inspector, ADB, Firebase, Logcat, Chrome DevTools
- Platform & PM: Multi-tenant SaaS, RBAC, PostgreSQL verification, Jira, Excel Issue Tracker, Agile/Scrum

CERTIFICATIONS

- Introduction to Software Testing • Black-box & White-box Testing • Web and Mobile Testing with Selenium — Coursera.
- OOP in Java — Chitkara University / Coding Ninjas

Achievements: District-level Basketball Player with strong teamwork and competitive spirit. Interests: Travel (Hodophile).
